

Service Engineer (Fire & Security)

Due to business growth in this rapidly expanding fire protection and security systems company, an exciting opportunity has arisen for a field based Service Engineer, in the North Wales & Cheshire area.

If you are looking for a new challenge with a market leading organisation, then this is an opportunity not to be missed.

Jackson Fire and Security is one of the leading independent fire and security solutions providers throughout the UK. We are now recruiting in North Wales & Cheshire to coincide with the company expansion in this region. Employing over 20 staff at head office in Flintshire, the company has grown steadily since it formed in 1991 and is now one of the most respected solutions led companies operating in the field. Offering installation and maintenance services, Jackson offers a wide range of solutions from basic fire extinguishers through to large commercial installations. With Gold standard industry accreditations and Investor in People awards, Jacksons are a supplier and employer of choice in the region.

Reporting to the Operations Manager, as a Service Engineer you will install, service and commission a wide range of fire and security systems. You will be allocated monthly tasks and operate independently to complete all work on time and to the required standard.

As a Service Engineer, your responsibilities and duties will include although not be limited to;

- Installing, servicing and commissioning small to medium sized fire and intruder alarms, CCTV and access control systems
- Providing certification for installed and serviced systems to comply with relevant British Standards
- Managing own diary to ensure allocated work is completed on time
- Responding to out of hours' calls, whilst covering on call duty.
- Attending head office for weekly meetings and stock collection

- Identifying potential opportunities where customers could benefit from using additional Jackson services

To be considered for this Service Engineer role you will have the following experience, qualifications, skills, knowledge and attributes;

- Proven experience installing, servicing and commissioning fire and security systems
- Good knowledge of addressable fire alarms, open and closed protocol systems and networked systems
- Experienced commissioning integrated fire and security systems
- Good knowledge of CCTV systems and preferably IP cameras
- City and Guilds Emergency Alarms Part 1 & 2
- Client focused approach with excellent interpersonal and communication skills
- Strong attention to detail and commercial awareness
- Ability to manage own work load with minimal supervision
- Full UK driving licence

Due to the nature of the business, successful applicants will be subject to a satisfactory DBS and BS7858 checks.

In return:

You will have the opportunity to join a growing business in a highly autonomous role, yet have the head office support to meet and exceed your targets.

Salary:	We can provide an excellent rate of pay to a highly skilled, customer focused service engineer.
Contracted Hours:	40 hours per week
Hours of Work:	8am to 5pm Monday to Friday. Flexibility may be required to support business and client needs
Location:	Field based covering North Wales & Cheshire
Contract Type:	Permanent
